

Total Fleet Solutions

Our fleet solutions cover the purchase, lease and hire of a wide range of vehicles from cars, 4x4s and motorcycles, through vans and other commercial vehicles (including heavy goods vehicles, such as refuse collection vehicles), to minibuses and coaches. Fuel trains of all types are accessible via our agreements, including hybrid, fully electric and other ultra low emission vehicles (ULEVs).

This is supported by a range of additional services including vehicle conversions, fleet management and maintenance, tyres and telematics.

We provide fleet managers with access to a wide range of agreements that cover the whole vehicle life cycle from vehicle hire to fuel cards and insurance to traffic management technology solutions - we have got all of your fleet needs covered, however big or small.

Crown
Commercial
Service

Choose CCS and benefit from:

great discounts: competitive standard discounts. You can save an average of 11% on leases and 10% on purchases above the average fleet discount.

direct order options: standard cars and light commercial vehicles can be bought or leased directly without the need to run a further competition

easy to use portal: online quotations and a full breakdown of costs allow you to compare options and evaluate whole life costs. Access the Fleet Portal for vehicles quotations: <https://fleetportal.crowncommercial.gov.uk/>

bulk buying: by combining your requirements with those of other organisations we can help you make great savings on the whole cost of vehicles - whether you need 1 or 1,000. We do this by using standardised vehicle specifications and using our bulk buying power to make your requirements more attractive to suppliers. We then run an eAuction for you, so there is very little administration for you to deal with, and you can save as much as 40% against MRP

local dealers: suppliers are responsible for the complete supply chain from manufacturer to after sales support, and you can choose a local dealer for delivery and after sales service

social value: build in social value and sustainability measures, such as opting for ultra low emission vehicles, or working with suppliers to offer apprenticeships or employment locally

Our new fleet portal

Our portal is new and improved, and gives you an easy way to obtain quotations to purchase or lease standard build cars and light commercial vehicles (LCVs).

On the new portal, you can:

- generate real-time quotes for purchase or lease – quickly and easily
- choose from a full range of vehicles and manufacturers
- compare up to 3 vehicles side by side
- filter results on key criteria including environmentally sustainable options
- review a full breakdown of whole life costs

You can access live quotes from all of the lease providers on Lot 1, ensuring competitive pricing and the ability to direct award; access a full breakdown of costs, so you can compare manufacturers; compare buy vs. lease prices and whole life costs for vehicles.

This will support decision making for both operational and salary sacrificed vehicles.
